### SUMMARY

I'm a Cloud Computing undergraduate at Sri Lanka Technology Campus (SLTC), and I enjoy building and deploying cloud-based applications on AWS. Over the past few years I've worked on full stack projects using Python, JavaScript, and modern frameworks, and picked up solid DevOps skills along the way — things like Docker, CI/CD, and automating infrastructure. I'm always curious to learn more, and I'm looking to grow further as part of a Cloud Engineering, DevOps, or Software Engineering team.

---

### PROJECTS

#### Personal Finance System – Sandbox & AI (Final Year Project)

*Ongoing*

- Interactive platform featuring a sandbox training environment and AI-driven financial guidance.

**Topics:** Python, AI Integration, Interactive Simulation

#### Cloud File Sharing Application

- Designed and deployed a secure, scalable file sharing application leveraging modern cloud services to deliver reliable performance and seamless data access.

**Topics:** AWS S3, Amazon DocumentDB, AWS App Runner

#### WeatherGuard Harvest Web App

- Engineered a cloud-enabled full-stack web application delivering real-time weather forecasting, AI-assisted cultivation recommendations, and automated SMS alerts.
- Integrated weather APIs and deployed on cloud infrastructure via automated GitHub Actions CI/CD pipelines.

**Topics:** Flask, Azure, SQLite, Python, Docker, GitHub Actions

#### AWS Containerized Web App Deployment

- Containerized a full-stack web application using Docker, reducing development/production environment inconsistencies.
- Automated image management via Amazon ECR and implemented CI/CD pipelines with GitHub Actions.

**Topics:** AWS, Docker, Amazon ECR, GitHub Actions, CI/CD

#### Serverless Weather Application

- Developed a serverless application on AWS Lambda and API Gateway for real-time weather data retrieval using a cost efficient, event-driven architecture.

**Topics:** AWS Lambda, API Gateway, S3, JavaScript

---

## TECHNICAL SKILLS

**Cloud Platforms:** AWS (EC2, S3, IAM, ECR, ECS, Lambda, API Gateway, Elastic Beanstalk, App Runner, DocumentDB), Azure

**DevOps & Automation:** Docker, Terraform, Git, GitHub Actions, CI/CD, Linux

**Languages & Frameworks:** Java, Python, JavaScript, TypeScript, Flask, React, Node.js, Express, Flutter

**Databases & BaaS:** MySQL, SQLite, MongoDB, DocumentDB, Supabase

**Tools & Core:** VS Code, Postman, Figma, REST APIs, Networking

---

## EDUCATIONAL QUALIFICATIONS

|                                                                                                        |                                  |
|--------------------------------------------------------------------------------------------------------|----------------------------------|
| <b>Sri Lanka Technology Campus (SLTC)</b><br><i>BSc (Hons) in Cloud Computing</i>                      | <i>Expected Graduation: 2027</i> |
| <b>D.S. Senanayake College, Ampara</b><br><i>G.C.E. Advanced Level — Engineering Technology Stream</i> | <i>2021</i>                      |

---

## CERTIFICATIONS

- AWS Cloud Practitioner Essentials
- AWS Cloud Technical Essentials

---

## SOFT SKILLS / AWARDS / EXTRACURRICULAR

Self-Learning & Technical Curiosity • Adaptability & Problem Solving • Clear Communication & Leadership • Teamwork & Time Management • Work Ethic & Resilience

**Cloud Security Enhancement:** Proactive cloud hardening & IAM policies.

**AI Agent Development:** Autonomous workflow agents & modern AI patterns.

---

## LANGUAGES

English: Professional Proficiency | Sinhala: Native Proficiency

**References:** Available upon request.
