PROFILE

Motivated Cloud Computing undergraduate at SLTC Research University with hands-on experience designing, deploying, and automating cloud-native applications on AWS. Skilled in building scalable full-stack solutions using Python, JavaScript, and modern frameworks, with a strong foundation in DevOps practices including Docker, CI/CD, and infrastructure automation. Eager to contribute technical curiosity to a Cloud Engineering, DevOps, or Software Engineering team.

KEY PROJECTS

Personal Finance System w/ Sandbox & AI *(Ongoing)*

- Interactive platform featuring a sandbox training environment and AI guidance.
- **Topics:** Python, AI Integration, Interactive Simulation

Cloud File Sharing

- Designed and deployed a secure, scalable file sharing application leveraging modern cloud services to deliver reliable performance and seamless data access.
- **Topics:** AWS S3, Amazon DocumentDB, AWS App Runner

WeatherGuard Harvest

- Engineered a cloud-enabled full-stack web application delivering real-time weather forecasting, AI-assisted cultivation recommendations, and automated SMS alerts.
- Integrated weather APIs and deployed on cloud infrastructure via automated GitHub Actions CI/CD.
- **Topics:** Flask, AWS, SQLite, Python, Docker, GitHub Actions

AWS Containerized Web App Deployment

- Containerized a full-stack web app using Docker, reducing dev/prod environment inconsistencies.
- Automated image management via Amazon ECR and implemented CI/CD pipelines with GitHub Actions.
- **Topics:** AWS, Docker, Amazon ECR, GitHub Actions, CI/CD

Serverless Weather Application

- Developed a serverless application on AWS Lambda and API Gateway for real-time weather data fetching using cost-efficient event-driven architecture.
- **Topics:** AWS Lambda, API Gateway, S3, JavaScript

CERTIFICATES

- AWS Certified Cloud Practitioner
- AWS Academy Cloud Foundations / Architecting
- Docker Foundations & Linux Systems

INTERESTS

- **Cloud Security Enhancement:** Proactive cloud hardening & IAM policies.
- **AI Agent Development:** Autonomous workflow agents & modern AI patterns.

TECHNICAL SKILLS

- **Cloud Platforms:** AWS (EC2, S3, IAM, ECR, ECS, Lambda, API Gateway, Elastic Beanstalk, App Runner, DocumentDB), Azure
- **DevOps & Automation:** Docker, Terraform, Git, GitHub Actions, CI/CD, Linux
- **Languages & Frameworks:** Java, Python, JavaScript, TypeScript, Flask, React, Node.js, Express, Flutter
- **Databases & BaaS:** MySQL, SQLite, MongoDB, DocumentDB, Firebase, Supabase
- **Tools & Core:** VS Code, Postman, Figma, REST APIs, Networking

SOFT SKILLS

- Self-Learning & Technical Curiosity
- Adaptability & Problem Solving
- Clear Communication & Leadership
- Teamwork & Time Management
- Work Ethic & Resilience

EDUCATION

SLTC Research University
BSc (Hons) in Cloud Computing
Expected Graduation: 2027

D.S. Senanayake College, Ampara
GCE Advanced Level
Engineering Technology Stream · 2021

LANGUAGES

- **English:** Professional Proficiency
- **Sinhala:** Native Proficiency
